

Here again a short report about the progress at Ahornberg-mountain

At present we are back again on each band except 23cm where we got a broken cable at the feeder of the dish. We have to take down the complete antenna and restore it because it runs since many years.

The new place for 432MHz

On the right side of the picture you can see the exciter for 144MHz, the IC765

Sven, DH8NAS and the dog Charly

At the first weekend of June there is in Germany and maybe some other countries a special contest for frequencies above 1.2GHz.

As we worked quite hard the last weeks restoring our QTH, Tomas and myself participated just for fun. I was working at 2.3 GHz; Thomas spent some hours at 3cm.

It's difficult to call cq on 13cm and to get an answer!

Thomas is relaxing at the keyer from the 3cm Stn

Last not least the used antennas, left the 90cm dish for 10368MHz, right hand the 1.5m dish for 2320MHz

73s to all, perhaps we will be on again beginning of July on 70cm and beyond!

Reinhold, DL6NAA
